Safety tips for a new school year

With the new school year right around the corner, it is a great time for parents to review and share safety precautions with their children. The following are some tips:

Walking Safety:

- If possible, have your child walk with a friend or in a group.
- Plan and practice a safe walking route with your child.

After-School Safety:

- Make sure a first aid kit is stocked and stored where your child can find it.
- If your child will be home alone after school, post an emergency phone list where they can see

it. This should include 9-1-1, phone numbers for parent's work and cell phone, as well as phone numbers for anyone else who is close and trusted.

Bus Safety:

- If your child rides on a school bus, make sure they wait for the bus to make a complete stop before approaching it from the curb.
- Remind your child to look both ways before stepping down from the curb, to be sure there is no moving traffic from either direction.

For added peace of mind, WH Security offers a custom home security alarm system to protect your home and children

24 hours a day, 365 days a year. In addition, WH Security offers interactive add-ons that allow you to control your door locks, thermostat and lights from anywhere you have an Internet connection. Through the use of this system, a user can receive information that indicates when their child returns home from school. The user can also remotely lock or unlock their doors if the child needs assistance. To find out more, visit www.wh-security.com or call a WH Security representative at (763) 477-3664.

If your child rides a school bus, make sure they wait for the bus to make a complete stop before approaching it from the curb.

WH Security is now offering Identity Theft Protection Services

Identity theft is a growing crime. It can wreck your finances and credit history. However, WH Security, in partnership with Zander Insurance, is happy to now offer identity theft protection services.

With identity theft protection, you can rest assured knowing that if you experience identity theft you will be protected. Zander Insurance will take of restoring your credit, recovering anything that was lost, and will speak to any necessary companies on your behalf. For just \$6.75 per month for individual protection, and \$12.90 per month for a family plan, coverage comes with the following benefits:

- Prevention services and support
- 100% recovery success
- Electronic stolen fund transfer protection
- \$1,000,000 reimbursement protection
- And more!

To sign up or learn more about identity theft protection services from WH Security, visit <http://goo.gl/BL8SrJ> or call a representative at (763) 477-3664.

Why testing your security system is important

In the same way that you test your smoke alarm on a monthly basis, you should also test your security system each month. Testing your alarm system ensures that your system is working properly and confirms proper connectivity and communication to your monitoring facility. Follow these steps to test your system:

1. Begin by calling the monitoring center and telling them to place your system on "test" mode.
2. Then, arm your system just like you would normally do when you leave your property. After arming the system, wait for the delay time to expire.
3. Go around your house and open and close doors or windows that are attached to the security system. If the system is working correctly, this will cause the alarm to activate. While the system is armed, as you are walking around the house, your movements will also trigger the motion detectors if there are any on the system.
4. After you have inspected all of your sensors, disarm the system as you normally would when you return home.
5. Finally, call back to the monitoring center to verify that the alarm signals sent by the security system were received.

In addition to performing the steps above, check to see if the manufacturer has any recommendations about how your devices should be checked. If you don't know the type of sensors you have or how to test them, simply contact a WH Security representative at (763) 477-3664 for more information. Also, as a WH Security customer, you can sign up to receive monthly reminders to test your alarm system by visiting: <http://goo.gl/fLptg>. WH Security also has a variety of sensor testing videos that can be found on YouTube by visiting: <http://goo.gl/bR3Zb7>.

Test your alarm each month to ensure it is working properly.

In the event that your identity is stolen, you will be covered with identity theft protection services from WH Security.

Free Monitoring-For-Life!

Just for telling your friends about WH Security

With each referral that signs up, you get \$50!

When you get to seven referrals, you receive Free Monitoring-For-Life!
