Two simple options for peace of mind

Independence - it's something all of us value. Whether it's simply the ability to live in our own home, or the freedom to continue our normal social life in the community, independence is invaluable. But the last thing we want is to compromise safety for independence. That's why WH Security now offers two unique medical alert systems that allow our loved ones to live their lives without risking their safety. Our medical alert systems are professionally monitored by WH International Response Center (WHIRC) - a national leader in central station security monitoring. That means help is just a push of a button away - 24 hours a day. We offer two different types of medical alert systems that match the needs and activeness of an individual:

In home

Linear

The Linear medical alert is ideal for those who primarily spend their time indoors. It comes with a two-way communication base and a pendant used to alert the monitoring center to an emergency situation. Linear requires a landline or cellular communicator, and has a battery life of one to two years. It can be worn as a bracelet, pendant or belt clip.

GPS - anywhere

SentryPal

SentryPal is for the user on the go. Coverage is nationwide and it communicates through the two-way voice, water-resistant pendant. The SentryPal is powered with cellular and GPS technology, allowing you to go anywhere you like and be confident that if you need it, help is just the touch of a button away. The addition of GPS also means that WHIRC can locate the client in the event of an emergency. Subscribers may not carry their cell phone with them 100 percent of the time, and during an emergency, a complicated cell phone may not be the safest way to call for help. The SentryPal's single button operation is the simplest way to call for help at home, at the park or anywhere they may need help. This product is excellent for: individuals that are aging in place; those with mobile or tele-health; lone worker protection; child safety and protection; first responders; law enforcement; and many others.

Medical alerts are a great way to ensure your loved one can receive the help they need while maintaining their independence.

There's no need to sacrifice independence for peace of mind. Medical alert systems ensure that you or your loved one is safe, and yet still able to enjoy a sense of freedom. For more information on medical alert systems from WH Security call (763) 477-3664. We have options for every individual, so you and your loved one can rest assured that help is just the push of a button away.

'Tis the season for flood sensors

This time of year is often wet in Minnesota. Excessive rain storms can cause thousands of dollars in damage to your home. And while we've been fortunate thus far, you never know what the weather will do in this state, so why not protect your home with flood and water sensors from WH Security?

Placed in the most likely locations that water will accumulate – floor drains, pipes and fixtures – flood sensors detect the presence of water wherever they are mounted. An alarm is then signaled should the sensors come in contact with water. This alerts WH International Monitoring Center – a nationally renowned leader in central station security system monitoring – which notifies you.

Also, if you're worried that your sump pump might fail, WH Security can install sensors in the sump pump basket right above the float that triggers the pump to run. If the water level gets too high in the basket, it will trigger your system and notify you of the problem – potentially saving you from hundreds to thousands of dollars in damages.

Floods can happen at any time, and you never know when your sump pump will fail until it's too late. To protect your home from water damage, contact a representative at (763) 477-3664, or visit <http://goo.gl/8rdhYb>.

**Don't let this happen to you.
Protect your home with flood
sensors from WH Security.**

Why you should consider service plans

When trying to plan for the unexpected it can be very challenging as we often do not know what expenses are coming our way. A service plan can help in the sudden need for maintenance.

WH Security offers a basic service plan and two extended service plans to residential customers for a monthly charge:

- **Basic Agreement:** \$5 plus sales tax for coverage of labor and trip charges to service any type of panel.
- **Extended Agreement I:** \$10.95 plus sales tax for coverage of parts, labor and trip charges for systems with 12 zones or less.

- **Extended Agreement II:** \$15.95 plus sales tax for coverage of parts, labor and trip charges for systems with 13-25 zones.

Both of the extended service plans are only for current product platforms WH Security actively sells, including: Concord 4, Lynx Touch, NetworX, Simon XT, Vista 20 and Vista 21 IP.

Service plans are different than a manufacturer's warranty, which are usually built into the purchase price for a set period of time.

To inquire about service plans with WH Security, email us at info@wh-security.com or call (763) 477-3664 and we will be glad to explain our options in detail.

Service plans can help save on unexpected maintenance and repairs.

Free Monitoring-For-Life!

Just for telling your friends about WH Security

**With each referral that signs up,
you get \$50!**

**When you get to seven referrals,
you receive Free Monitoring-For-Life!**
