# PROTECT WHAT'S MOST IMPORTANT WITH MONITORED ENVIRONMENTAL SOLUTIONS

Protecting what's important to you goes far beyond window and door sensors. Environmental sensors like smoke and carbon monoxide detectors are a staple in every home; however, monitoring these sensors through your WH Security system offers an added layer of safety and protection.

Traditional smoke and carbon monoxide sensors work great — when you're home. But they won't dispatch emergency personnel if they are tripped while you're away on business or a family vacation. As soon as monitored environmental sensors are tripped, the sensors notify dispatchers at WH International Response Center, who contact emergency services — saving you and your family from potentially serious damages or harm.

Environmental sensors can be hardwired or wireless. In the past 25 years, wireless technology has come a long way. Today's systems WH Security installs are what are called a "hybrid," meaning that a combination of hardwired and wireless technologies are installed to meet the demands of the home/business space and time. A WH Security representative can explain your options and help you decided which one would work best with your system.

Call WH Security today at (763) 477-3664 to discuss environmental sensors for your home.

## Get your hands on DragonFly

Dragonfly is an interactive, do-it-yourself, motion-activated-video security system perfect for your friend or relative who's not likely to stay in one place for very long. College kids, renters, or anyone looking for a completely wireless security option will love this product.

DragonFly features video verification through motion-activated cameras. You can then view video alerts, arm and disarm your system and dispatch emergency services if you choose to self-monitor. All of this is done through the DragonFly mobile app, which also features easy installation instructions.

If you don't want to monitor Dragonfly yourself, you can get first-class monitoring from WH International Response Center for a monthly fee of \$30.

Shop for DragonFly today at <https://goo.gl/TE8BLD> or by calling 1 (844) 581-4241.

## UPGRADE to interactive services!

We are currently living during the height of the digital revolution. There is more information and capabilities available in the palm of your hand than at any other moment in our history, including for your WH Security system.

Through interactive services, users can utilize the latest technology to access countless functions within their home:

- **Receive real-time notifications** by text or email to know what is happening at home the moment something occurs.
- **Arm and disarm** your security system and check the arming status.
- **Lock and unlock doors** remotely. You can even control your garage door.
- **Set lighting schedules** for when you're away, and take complete control of your homes lights.
- **Manage your thermostat** so that your home is the perfect temperature when you arrive, and save energy while you're away.
- **Check the history** of events that have activated your security sensors, or search for specific occurrences.

Due to the fact that not all technology is compatible with interactive features, certain updates and changes may need to be made. Now is the perfect time to upgrade your panel and add interactive services — just call WH Security at (763) 477-3664.

## Live Your Life with SentryPal Interactive Services!

There's no need to sacrifice independence for peace of mind. SentryPal — a GPS medical alert system from WH Security — ensures you or your loved one is safe and able to enjoy a sense of freedom.

SentryPal is for the user on the go, or anyone with an active lifestyle. Whether you have an elderly loved one, a child whom you'd rather not have a cell phone, or anyone in between, this is the perfect solution since help is just the touch of a button away.

This GPS medical solution is a cellular device that works nationwide wherever it can establish a cellular signal. That means users are sure to receive help whether they're at home alone, or at the park with family and friends. Users communicate through a two-way, water-resistant pendant in the event of an emergency. SentryPal also offers first-class, 24-hour-a-day monitoring from WH International Response Center.

Visit <https://goo.gl/qLnMDS> or call (763) 477-3664 for more information.
