FEEL SAFE KNOWING YOU'VE GOT **SentryPal** BY YOUR SIDE

According to the Centers for Disease Control and Prevention (CDC), more than one out of four older people falls each year. Falling is a serious and scary situation for elderly people and their loved ones. That's why WH Security offers SentryPal — a mobile medical alert system that meets any individual's needs.

SentryPal is a cellular device that utilizes GPS technology. It works nationwide

wherever it can establish a cellular signal. Users can remain active and feel safe knowing they can communicate through the two-way, water-resistant pendant in the event of an emergency.

Users also receive first-class monitoring from WH International Response Center (WHIRC). WHIRC is a UL certified monitoring center and a national leader in central station security monitoring.

For more information on SentryPal, or other medical alert systems offered from WH Security, call (763) 477-3664 or visit goo.gl/a046Ca.

Give the gift OF COMPLETELY WIRELESS SECURITY

Looking for a gift for your tech savvy child or family member that's more than just a distraction? Give the gift of a completely wireless security system from WH Security.

DragonFly is perfect for college students, renters, or anyone who prefers do-it-yourself (DIY) projects and control in their hands. DragonFly is completely customizable. You choose the location and amount of motion-

activated cameras for your residence and follow the installation instructions provided. Home security has never been so user-friendly!

Even though DragonFly is completely wireless and DIY, you can still choose to receive the same first-class monitoring all WH Security customers receive from WH International Response Center (WHIRC). WHIRC is notified when an alarm is triggered and can determine

if emergency services should be contacted. Should you wish to forego traditional monitoring, you may also choose to receive notifications on your mobile device through the DragonFly app. Once you have been notified of an alarm, you decide whether emergency services should be dispatched.

The best part is that you get to take your security system with you to your next home and easily customize a system for the coverage area of your new residence! DragonFly truly is the gift that keeps on giving!

Call (763) 477-3664 for more information.

HOME SECURITY

TIPS FOR THE HOLIDAYS

Ensuring that your home is safe and secure is important, especially if you are travelling over the holidays. No one wants to come home to unexpected damages, bills or burglaries after spending time with family and friends. Here are some tips you can take to make sure your home is safe and secure this holiday season.

An easy way to cut back on your energy bill and avoid potential fires is to unplug any unnecessary appliances or electronics around your home. No one will be watching your TV, using your computer, coffee maker or toaster, so unplug them before your holiday trip.

Social media is wonderful way to connect with people and share things. And while the photo of your aunt Jenny's Christmas tree may be racking up likes on Facebook, it can also tell thieves that you're not home. You never know who has access to your social media accounts, and information is easily passed along.

A driveway left covered with snow and newspapers stacked up outside your door advertise that your home has been unoccupied for some time. Have a neighbor shovel your driveway and collect your mail, and utilize lighting timers to make it appear that you're home.

One of the most proactive steps you can take is to install a home security system. WH Security offers customizable solutions tailored to the customer's needs that add greater levels of protection than are attainable by the best security tips or tricks. For more information, call a representative at (763) 477-3664.

SAVE ON INSURANCE

with monitored smoke detectors

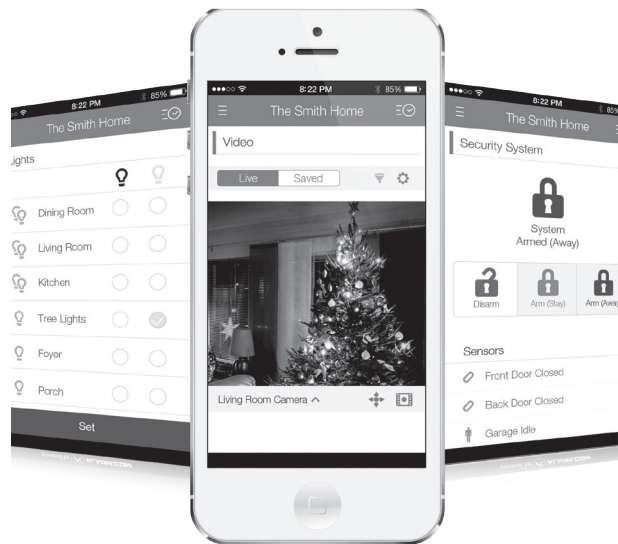

When it comes to home security systems, most people are looking to secure and protect their belongings from burglars. But WH Security also offers extra features—like monitored smoke alarms—that can save you and your family in more ways than one.

Insurance agencies are fully aware that homes protected with security systems and monitored smoke sensors are less likely to have fire damage. That not only saves you money, but your insurance company saves as well since you're less likely to file a claim. Agencies oftentimes like to reward people with these technologies by giving them a discount on their homeowner's insurance. Some agencies offer discounts on premiums up to 20 percent!

To see if you qualify for a discount, contact your insurance agent. You will most likely need a copy of a security certificate, which WH Security will happily provide. Just call us at (763) 477-3664. If you're already taking advantage of this discount, be sure to check with your insurance provider to see if you qualify for any additional savings through other technologies.

*Home for the holidays
...even if you're not*

In addition to your professionally-monitored system, WH Security has a revolutionary wireless service that enables you to always know what's happening at home. With alert notifications and state of the art services like video monitoring, interactive security, thermostat adjustment and light control, you'll have confidence knowing that the people and things you love will stay safe.
