Monitor your home

WHILE YOU ARE AWAY

Do you wish you could access features of your home from your mobile phone or tablet? If so, WH Security's revolutionary interactive security services are the way to go. Through a free app, you can take control of many different aspects of your security system anywhere you can access the Internet or have a cellular signal.

Interactive features include:

- Arm and disarm your system and check the arming status at any time.
- Receive real-time notifications by text or email to know what is happening at home the moment something occurs.
- Check the history or search for specific events that have activated your security sensors.
- Set custom lighting schedules or control your lights whenever you like.
- Lock and unlock doors remotely.
- Turn on your air conditioning, heating system, cameras and more.

WH Security's interactive security services make home security and energy management easy. They can be added onto most existing systems or installed as a part of a new system that is monitored locally 24 hours a day, 7 days a week. For more information, visit <http://goo.gl/XbfPKS> or call (763) 477-3664.

SAVE ON INSURANCE WITH MONITORED SENSORS

In addition to traditional home security systems that alert you when doors and windows are opened, WH Security also offers monitored sensors that can save you and your family in more ways than one. Our monitored sensors include smoke, carbon monoxide (CO), temperature and water and are monitored 24/7 by our local monitoring center. Insurance agencies are fully aware that homes protected with security systems and monitored sensors are less likely to have damage from fire, water or frozen pipes. That not only saves you money, but your insurance company saves as well since you're less likely to file a claim.

Agencies often provide homeowners insurance discounts for those with monitored sensors. To see if you qualify for a discount, contact your insurance agent. You will most likely need a copy of a security certificate, which WH Security will happily provide. Just call us at (763) 477-3664. If you're already taking advantage of this discount, be sure to check with your insurance provider to see if you qualify for any additional savings through other technologies.

WHSECURITY

Stay safe while on the go

If you have an active lifestyle or have medical concerns that put you at risk of falling, our SentryPal mobile medical alert system is an excellent option. Those who are active and may not want to keep a cell phone on them can call WH Security to set up a SentryPal cellular device. SentryPal utilizes GPS technology and works nationwide wherever it can establish a cellular signal. Simply press the single button on the water-resistant pendant for two-way communication between the user and a local 24/7 monitoring center.

For more information on SentryPal, which is great for active seniors, or other medical alert systems offered from WH Security, call (763) 477-3664 or visit <http://goo.gl/KuVpNc>.

WH SECURITY IS GETTING A MAKEOVER.

We are kicking things off with a new logo and you will see other changes happen gradually as we move through 2018.

Thank you for your continued business. We wish you success and happiness in the New Year!

WHSECURITY

KNOW WHEN CO LEVELS ARE HEIGHTENED IN YOUR HOME

The winter months are the most common time for carbon monoxide (CO) poisoning incidents to occur. In fact, 10 people living in a Saint Paul, Minnesota, duplex were sent to the hospital on New Year's Day after experiencing symptoms of CO poisoning. Police reports noted that CO detectors were missing and disabled in the home.

CO is a poisonous, colorless, odorless and tasteless gas. At high levels, CO can be dangerous to human health and even threaten your life, but a monitored CO sensor in your home can alert you to this danger. WH Security's CO sensors monitor the air quality inside your home. If CO is detected at any time, our local 24/7 monitoring center will contact the home owner immediately and dispatch emergency vehicles if needed.

TO PROTECT YOUR FAMILY THIS WINTER:

- Make sure that air vents are not blocked.
- Do not use a gas oven to heat your home for any length of time.
- When idling a car, back it out of the garage so fumes do not build up in your garage and in the living area of your home.
- Do not sleep in a room with an unvented gas or kerosene space heater.
- Do not use any gasoline-powered engines (mowers, weed trimmers, snow blowers, chain saws, small engines or generators) in enclosed spaces.
- Never ignore symptoms, particularly if more than one person is feeling them. If CO poisoning is suspected, exit the space immediately and call 911.

It is very important to have a CO sensor in your home. For more information on the monitored sensors offered by WH Security, please visit <http://goo.gl/8rdhYb> or call a representative at (763) 477-3664.
