PROTECT YOUR HOME WITH AN ALULA ENVIRONMENTAL SENSOR PACKAGE

Do you worry about pipes freezing, a fire starting, or other environmental hazard occurring while you are traveling or away from home? Environmental sensors are designed to alert you and a monitoring center when a hazard is detected so you and emergency services can act. WH Security is now offering the Alula environmental package as a quick and easy way to protect your home.

The Alula environmental package includes:

- One water and temperature sensor that will alert you when it detects water and extreme temperatures — over 100 and under 45 degrees F.
- One carbon monoxide sensor.
- One smoke sensor.
- One panel and keypad.
- Quick and wireless installation.

24/7 security monitoring

Our environmental sensors are monitored to ensure your alarms are quickly resolved and properly routed and prioritized. WH Security systems are monitored 24/7 by WH International Response Center located in Rockford, MN who will quickly respond, contact you and if necessary, dispatch emergency services to your home. If you miss the non-emergency call, the monitoring center will alert your list of back up contacts so action can be taken.

Call now to schedule an installation and ensure your home is safe this winter before heading south.

TIPS TO KEEP YOUR GARAGE SECURE

Garages often store the most expensive things we own including cars, riding lawn mowers, and bikes. Garages also offer access to your home. Here are five tips to improve the security of your garage:

INSTALL STRONG LOCKS

Make sure that your garage service door and door to your house have strong locks that are difficult to pick or break.

USE SECURITY LIGHTING

Install motion-activated lights around your garage to deter intruders from approaching. This will also make it easier to see any suspicious activity at night.

KEEP VALUABLES OUT OF SIGHT

Store your expensive tools and equipment out of sight from windows or doors. This will make it less tempting for thieves to break in.

SECURE WINDOWS AND DOORS

Make sure all windows and doors are securely locked when not in use.

ADD CONTACTS AND SENSORS

Consider adding an overhead door contact and regular door sensors, window sensors and glass break sensors.

WH Security offers overhead door contacts to fit any size door including your shed. Features include:

- » Hardwired or wireless installation.
- » Armored cable protection.
- » Designed to prevent false alarms.
- » Can connect to almost any security panel.

By taking these simple steps, you can be sure your garage and shed are safe and secure spaces to store your valuable possessions and to protect your home.

GIVE \$25, GET \$25!

Refer your friends and you'll both receive a \$25 bill credit* when they sign up to be protected by WH Security.

PLANNING A WINTER GETAWAY?

Schedule a service call before you travel this winter.

Call today to get on WH Security's service schedule to keep your home protected while you are away. Did you know that we offer three different service plans? They cover some or all the costs accrued during a service call. Service plans also include one free system check per year, which helps to ensure that your system is always in excellent working order. They help keep your system working smoothly and your budget intact. Service plans range in price from \$7.95 to \$15.95 per month, making them good for your system and your budget.

BASIC \$7.95 month

Includes annual system check, free trip and labor*

EXTENDED \$10.95 month

Includes annual system check, free parts, trip and labor - Up to 12 zones*

EXTENDED

PLUS \$15.95 month

Includes annual system check, free parts, trip and labor - 10 to 25 zones*

Service plans include one free system check per year. Customer must call to schedule this check.
