HOME SECURITY TIPS FOR YOUR VACATION

Vacations are meant for relaxation, adventure, and stepping away from daily worries. However, leaving your home unattended can make it a target. Make sure your trip is worry free with these security tips.

SECURE ALL ENTRY POINTS

Before leaving, double-check that all doors and windows are locked. You can also:

- Install deadbolts for added security.
- Use smart locks to remotely control access.
- Reinforce sliding doors with security bars, a sturdy piece of wood, or length of PVC pipe.

PAUSE YOUR POSTS TO SOCIAL MEDIA ACCOUNTS

It's tempting to share vacation moments online, but doing so can alert criminals that you're away. Instead:

- Wait until you return to post photos and updates.
- Adjust privacy settings to limit who sees your travel plans.

MAKE YOUR HOME LOOK OCCUPIED

- Set timers on lights or install smart lights to turn on and off at different times.
- Have a trusted friend or neighbor collect mail and take out the trash.
- If snow is in the forecast, arrange for someone to clear your driveway.
- Use a video doorbell to see and communicate with visitors.

INVEST IN A SECURITY SYSTEM FROM WH SECURITY

At WH Security, we provide intrusion protection systems designed to detect unauthorized entry into your home. Our professionally monitored sensors will alert you and the monitoring center if there is an alarm. Add-on sensors — like smoke, carbon monoxide, water, and extreme temperature sensors — keep your home protected 24/7, whether your system is armed or not.

SAFE TRAVELS!

GIVE \$25, GET \$25!

Refer your friends and you'll both receive a \$25 bill credit* when they sign up for a WH Security system.

*Certain restrictions may apply. Medical alerts are not included.

BUSINESS SECURITY SOLUTIONS FROM WH SECURITY

Protecting your business requires smart, reliable security. WH Security offers customizable solutions that include intrusion protection, access control, remote access, video surveillance, and more to help safeguard your assets, employees, and data.

SMART ACCESS CONTROL, ANYWHERE

Manage who enters your business with cloud-based access control. Add or remove users remotely, control doors from any location, and view corresponding video clips in real time. Built-in automation, alerts, and scheduling help reduce false alarms and improve efficiency.

SURVEILLANCE THAT WORKS FOR YOU

Our HD surveillance cameras offer real-time and recorded footage to help prevent theft and monitor activity. With 4MP video, night vision, and remote access, you'll have peace of mind knowing your business is protected — day or night.

BUSINESS ACTIVITY ANALYTICS

Business Activity Analytics upgrades security cameras with tools like people counting, heat mapping, crowd detection, and queue monitoring. These features help businesses track foot traffic, improve layouts, enhance safety, and boost customer service — all from one easy-to-use platform.

ONE PLATFORM FOR TOTAL CONTROL

Our unified, cloud-managed platform combines access control, video surveillance, and remote monitoring in one easy-to-use dashboard, delivering real-time insights and streamlined security management.

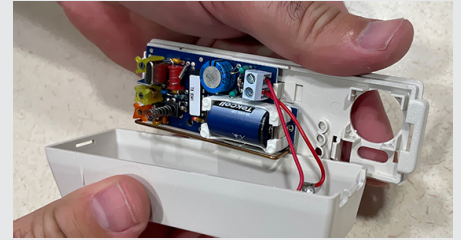

SMART ENERGY & TEMPERATURE MONITORING

Reduce costs and protect sensitive assets with automated smart thermostats and sensors. Monitor server rooms, freezers, or supply storage, and get instant alerts if temperatures go out of range—backed by battery-powered, LTE-connected devices that stay online during outages.

TAILORED TO YOUR BUSINESS

No two businesses are the same. WH Security works with you to create a custom solution that fits your unique needs — helping you stay protected and in control.

REMEMBER TO CHANGE YOUR SENSOR BATTERIES

One of the most common yet overlooked maintenance tasks is changing the batteries in your security sensors. Making sure your sensors have fresh batteries can help keep your system working reliably.

Change smoke sensor and carbon monoxide sensor batteries every three years and door, window, and motion sensors every three to five years. Here is how:

1. Disarm your security system.
2. Call your monitoring center, WHIRC, at 888-858-7811 and let them know you need your system placed in test mode.
3. Gently remove the cover from your sensor and replace the battery.

If you have trouble removing the cover, call technical support at 763.477.3664 during business hours.

WH Security also offers a service plan which includes an annual system check, trip fee, labor, and more!

SPRING SPECIAL!

Buy a video doorbell and get four sensor batteries replaced for FREE!
